solutions

Company Profile

InnoVinn is a high-end provider of software & hardware development solutions and services for the global marketplace.

Software and Hardware Development

Product Development and Re-engineering

Maintenance of Products and Application Systems

Building Hi-Tech Teams

Research & Development

InnoVinn was established in 1990 to address the need for rapid, cost effective project based software and hardware development for the Telecommunications industry in emerging countries throughout Europe and beyond.

The founders of InnoVinn have created a solid company with a unique vision. Our mission is to help you to achieve your financial objectives by providing you with access to innovative, world class software and hardware development solutions and services whenever you need them.

After years of research, development and investment this vision is starting to take shape with a unique range of products and services for Telecommunications, IT and other industries.

About InnoVinn

A Strong Management Team

InnoVinn is a financially secure company with an outstanding reputation that is a testament to the continuous investment that is made in people, technologies and facilities.

Olga Skydan, CEO
M.Sc., Ph.D., EMBA

Dr. Olga Skydan is Chief Executive Officer of InnoVinn, with overall responsibility on a global basis for Sales and Business Development of the company.

Olga has held various business strategy, management and systems engineering positions within InnoVinn. She has been extremely successful at introducing innovative IT solutions which have resulted in a tremendous increase in productivity and financial return for the company. Under her guidance InnoVinn has serviced dozens of customers and continues to see constant growth year-over-year.

Olga holds an EMBA from International Institute of Business, Ukraine and a Ph.D. in Mathematical Modelling from Vinnytsya State Technical University, Ukraine.

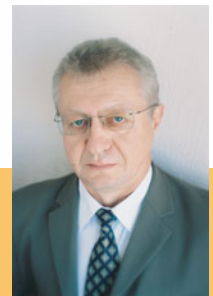

Yuriy Skydan, Founder and CTO
M.Sc., Ph.D.

A co-founder of InnoVinn in 1991, Dr. Yuriy Skydan has a track record of successfully bringing new solutions to existing markets. He is responsible for company strategy and development of all core technologies. At InnoVinn, Yuriy sets the technical vision for the company, including our product, service and partnership roadmaps.

Yuriy has more than 20 years of teaching experience in the field of Computer Science and Microprocessors at the Vinnytsya National Technical University in Ukraine. With a strong background in Information Technology, Yuriy is the driving force behind InnoVinn's continuous innovation.

As a business visionary Yuriy has the all too rare gift of being able to clearly formulate and communicate his ideas, energising and exciting fellow directors, staff and customers alike.

Key Personnel

InnoVinn has recruited high quality multi-talented software developers, architects, engineers, consultants and more to deliver its ambitious vision.

Galyna Skavronska, CFO
M.Sc.

Galyna brings a wealth of experience and professionalism to InnoVinn. She is responsible for overseeing global accounting, finance and the investor relations activities.

She holds a Masters degree in Accounting and Business Administration from the University of Economics in Ukraine.

Yuriy Kochetov
Head of Network Management
M.Sc.

With vast experience of Project Management and Development, Yuriy now leads the InnoVinn Network Management division.

Yuriy is proficient in multiple technologies and was specifically selected to join the InnoVinn team having previously played a pivotal role in the development of mission critical technologies for several other businesses.

Nadya Posvyatenko
VP, Sales and Marketing
M.Sc.

As VP of Sales & Marketing for InnoVinn, Nadya is responsible for providing leadership and vision for scaling InnoVinn's growth.

Nadya brings many years of experience in sales and marketing management with an intense focus on Telecommunications marketing.

Sergei Simonchuk
Head of Network Monitoring
M.Sc.

A professional manager and applications developer, Sergei joined the team as a key Architect for our Network Monitoring Solutions.

His experience allows InnoVinn to rapidly develop new solutions for our customers in the Telecommunications and IT industry.

Alexander Skydan
VP, Outsourcing Services
B.Sc., Ph.D.

With several years of industry experience in the execution of complex IT projects, Alexander brings a wealth of expertise in managing and mobilising project teams, maintaining quality assurance and establishing communication protocols with customers, partners and investors.

Alexey Boyko
Head of Maintenance and Support
M.Sc., Ph.D.

Alexey was appointed Head of Maintenance and Support Department in 2007.

He has been with the company in various technical and managerial positions since 2000 including an Software Developer, System Architecture and Senior CS Engineer.

Bugzilla, Mantis
SilkTest

A close-up photograph of a person's hand holding a tablet. The hand is wearing a silver metal-link watch. The tablet screen shows a map with various colored regions. The background is blurred, suggesting an office or business setting. The overall tone is professional and modern.

Services

InnoVinn services address the specific needs of our customers from small businesses to global corporations.

Software and Hardware Development

InnoVinn delivers robust, scalable and cost-effective software and hardware solutions from requirements analysis, through application design, to coding, testing and QA - including development and maintenance.

Product Development and Re-engineering

Stemming from a clear understanding of the special requirements involved, InnoVinn offers cost effective solutions for developing products from concept as well as taking on the task of re-engineering your winning products for cost reduction or lifecycle management to secure your future.

Maintenance of Products and Application Systems

At InnoVinn we understand the criticality of high quality maintenance and have established a mature product maintenance and support services division. We offer well-defined processes for the maintenance of your products and applications, including implementation and integration at your client sites.

Building Hi-Tech Teams

InnoVinn offers a service model for creating and managing teams of professional employees dedicated to a specific client's work. The dedicated team may become your own virtual back office, which can be seamlessly integrated into your existing operation.

Research & Development

Take your R&D offshore with InnoVinn. Our Research and Development capabilities are augmented by our close relations with several leading universities in Ukraine. These links can be useful for scientific intensive projects which involve a great deal of mathematics, the optimization of algorithms or complex modelling.

A person wearing a tan pith helmet and red binoculars, peering through tall green grass. The person's face is mostly obscured by the grass and the binoculars. The background is a soft-focus green field.

Customers

InnoVinn has worked with both small to medium sized businesses and global corporations alike, and all of them are confident that their decision to work with InnoVinn was definitely the right one.
